- **Infrared camera converted by LifePixel** <https://tinyurl.com/Lifepixel-IR>. My Olympus camera was converted by LifePixel. I did a full spectrum conversion so that I can put a visible filter back on if I wanted to bring the IR as a backup camera. I then use one of these two filters, either of which I can also convert to BW. Filter Band: Hyper Color Infrared (470nm) and Filter Band: Super Color Infrared (590nm). Want more info? go to <https://tinyurl.com/Lifepixel-IR> and then "start here"

- **Spider Holster**

- The SpiderPro Camera Holster is designed to take the weight of your pro gear away from your upper body and put it at your waist- the most ergonomic place to carry heavy gear (just ask a carpenter with a full tool belt!). The Holster system lets your camera hang safely at your hip when you're not shooting, and quick-draw to an active shooting position as soon as you're ready to catch the shot.
- Spider Holster Spider Pro Single Camera System
 - The SpiderPro single camera system contains everything that you need to carry one camera. This includes the dedicated SpiderPro Belt, SpiderPro Holster, SpiderPro Plate which easily attaches directly to your camera's tripod mount, and a SpiderPin which attaches to the Plate and slides into the Holster to give your camera freedom of movement at your hip.
